

Demonstration of Proposed Features

Date	12 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Authentication	Allows users to register and securely log in to the application before accessing loan prediction features.	Implemented	Yes	Working successfully.
2	Financial & Property Data Collection	Collects user information such as financial details and property documents through a web form.	Implemented	Yes	Input validation performed successfully.
3	Loan Prediction	Uses the trained machine learning model to predict the user's loan eligibility and creditworthiness.	Implemented	Yes	Accurate predictions generated from user input.
4	Dashboard & Data Visualization	Displays prediction results and loan terms using graphs, charts, and summary statistics.	Implemented	Yes	Graphs displayed correctly on the dashboard.
5	Personalized Loan Offers	Provides tailored loan offers and terms based on the predicted creditworthiness and input data.	Implemented	Yes	Offers generated dynamically.
6	Flask Web Application Integration	Integrates the frontend, backend, dataset, and machine learning model into a complete web application.	Implemented	Yes	End-to-end workflow tested successfully.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
