

Project Demo Planning

Date	12 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, explain the objective, problem statement, and importance of predicting well-being using Machine Learning.	2	Maddiboina Triveni
2	Dataset & System Workflow	Explain the dataset, preprocessing steps, feature selection, and overall project workflow.	3	Maddiboina Triveni
3	Machine Learning Model	Demonstrate the Linear Regression model, model training, prediction process, and evaluation results.	3	Maddiboina Triveni
4	Live Web Application Demo	Demonstrate user Financial data entry, prediction generation, graphs, dashboard, and recommendations.	5	Maddiboina Triveni
5	Technical Implementation	Explain the project architecture, Flask backend, libraries used, and technology stack.	2	Maddiboina Triveni
6	Conclusion & Future Enhancements	Summarize the project, discuss future improvements, answer questions, and thank the evaluators.	2	Maddiboina Triveni

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why measuring overall well-being is important, the limitations of existing solutions, and the objective of the project.
2	Solution Overview	Present the project architecture, technology stack (Python, Flask, Scikit-learn, HTML, CSS, JavaScript), dataset, preprocessing steps, and Linear Regression model.
3	Live Feature Demonstration	Demonstrate the complete workflow: user login → health & lifestyle data entry → prediction generation → dashboard → graphs → personalized recommendations.
4	Q&A Session	Answer evaluator questions, explain project modules, discuss challenges faced, and describe possible future enhancements such as advanced ML models, cloud deployment, and mobile application support.
